

Ice Bath Recovery Experience

Our guided ice bath sessions are the perfect recovery ritual after long surf sessions and active retreat days. The cold water helps reduce inflammation, accelerate muscle recovery, boost circulation, and leave your body feeling refreshed and re-energized. Beyond the physical benefits, the ice baths also become a powerful mental experience — teaching you how to breathe through discomfort, stay present, and reconnect with your inner strength. Surrounded by nature and supported by the group's energy, it's an experience that leaves you feeling both deeply grounded and fully alive.
